PRESS RELEASE

August 28, 2014

To: GenFlex Customers

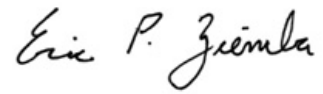

Subject: Important Adhesive Product Update

Beginning September 1, 2014, new VOC regulations will go into effect for the following Utah counties: Box Elder, Cache, Davis, Salt Lake, Tooele, Utah, and Weber. These seven counties were found by EPA to not meet the tightened air quality standards set forth a few years ago.

In an ongoing effort to comply with VOC regulations, GenFlex Roofing Systems will discontinue the sale of the standard adhesive/primer and sealant products in these counties. As an alternative, please order our [Single-Ply LVOC Bonding Adhesive](#). Please note that the regulation does allow the use of standard VOC products if they were manufactured prior to 9/1/14.

GenFlex is dedicated to helping you stay informed of the latest product and technical information as well as industry updates. For more information, please see [Utah VOC restrictions rule](#).

Best Regards,

Eric Ziemba
General Manager
