EZ TPO PEEL & STICK™
Advanced Adhesion Technology
ADVANCED ADHESION TECHNOLOGY

Until now, if you wanted to use self-adhered membranes you needed to trade some degree of performance for convenience. Especially if you ever wanted to roof at 50 °F or less. That trade-off ends with GenFlex EZ TPO Peel & Stick with advanced adhesion technology.

Now you can have extreme performance, even down to 20 °F, with self-adhesive technology that blows away competitive membranes. All while enjoying the convenience of no chemicals, buckets, mixing or waiting.
WHY YOU SHOULD INSTALL

COLD & HOT WEATHER PERFORMANCE

Significantly expand your installation window by installing GenFlex EZ TPO Peel & Stick, even down to 20 °F with outstanding adhesion.

ADHESIVE STRENGTH

GenFlex EZ TPO Peel & Stick is twice as strong* as the nearest self-adhered membrane competitor.

No primer needed to install on all common roofing substrates.

(*Under specific laboratory conditions)

INSTALLATION SPEED

With zero flash off time, and without the need to mix and apply adhesives, GenFlex EZ TPO Peel & Stick installs from two to five times faster than standard, fully adhered systems (depending on ambient conditions).
